RODRIGO AMBROCIO

Correlational Statistical Study

Author: Rodrigo Ambrocio

I currently work as a computer science teacher with adolescents, I am 27 years old and I have been doing this data collection, verification and correlation study for more than two years, which has been done with my own resources since it does not have the support of any institution, with the objective to show patterns between vaccination dates and death dates with a possible relationship to Covid19 vaccines.

Doctors who endorse this study::	
 Dr. Ismael Gómez	 Dr. Oliver Villalta
 Dra. Jimena Campos	 Dr. Noel Rodríguez
 Dr. Fredy Portillo	 Dra. Karely Amador

Clarifications:

This study has **no relationship or support from any organization**, it is for statistical purposes only. This work was carried out with due respect for the people who appear in it, as well as their respective families.

For this study I have spent about 400 dollars at the moment, **unfortunately** I have **not** been able to get the support to cover that cost, so **your support is needed**, that way I can cover the cost and work on the next expansion, in exchange for your donation, you can add your name in the acknowledgments section of said extension, which on this occasion I will work to turn it into book format and make it a historical document. I clarify that I am not a doctor, I currently work as a computer science teacher with teenagers.

Guatemalan Vaccinated Deceased Youth

Deaths due to crime, traffic accidents or other violent causes are not included. Neither did those who went to get vaccinated in other countries.

This segment includes minors and people up to 39 years of age.

Obtaining the data of minors is complex, so only the cases where the information was accessed are presented.

The 104 young people who died and who are presented in this study are only the cases to which the information was accessed until March 2, 2023.

Dear CMA Presidents Dr. Alika Lafontaine (2022-23) and Dr. Katharine Smart (2021-22)

Re: Sudden deaths of 132 young Canadian doctors since rollout of COVID-19 vaccines

I wrote two letters, dated Sep.3, 2022 and Oct.15, 2022, alerting you to the rise in sudden and unexpected deaths of young Canadian doctors since the rollout of COVID-19 vaccines. To date, I have not received a response from anyone at CMA. On twitter, CMA addressed these sudden deaths as "disinformation" and you encouraged Ontario family physician Dr. Michelle Cohen to suppress this serious safety signal. You all did so, in clear violation of medical ethics and your Hippocratic Oath.

Thank you, @DocMCohen, for standing up to #disinformation.

There is no evidence supporting the various theories that have been circulating. We encourage all Canadians to be up to date with all their vaccines to prevent serious health issues. #CDNhealth

I am now providing you with an update and information about **132 young Canadian doctors who died suddenly or unexpectedly since the rollout of COVID-19 vaccines**. I note for the record that CMA and Dr. Alika Lafontaine hosted an International Conference on Physician Health in Orlando, Florida on October 13-15, 2022 where you failed or refused to address these sudden deaths of your colleagues.

I also note that former **CMA President Dr. Gigi Osler**, who unethically promoted Moderna mRNA vaccines, was appointed by Prime Minister Justin Trudeau to the Canadian Senate on Sep.26, 2022 and you congratulated her, stating that a CMA bureaucrat could one day become Prime Minister of Canada. Yet you unethically turn a blind eye to an excess mortality of your physician colleagues of **53% in 2022**.

I implore you again to remember your Hippocratic Oath and your own *CMA Code of Ethics*, and call for an immediate halt to all COVID-19 vaccine mandates in Canadian healthcare.

Dr. William Makis MD, FRCPC

“96 Canadian children aged 2 to 19 have died suddenly in the last 3 months and no “expert” knows why, a wake-up call for Canadian parents, Dr. William Makis, 02/27/2023.”

Dr. Makis collected information on 96 deceased children. The investigation of the vaccination dates is pending.

The findings of the autopsy performed by **James Gill, MD; Randy Tashjian, MD; Emily Duncanson, MD**, are also shared by **Dr. Makis**. Autopsies were performed on two teenagers who died in their sleep within the first week after receiving the second dose of Pfizer COVID-19 mRNA.

Due to privacy issues, not all of the 96 registered children are shown. **Font: <https://makismd.substack.com/p/over-96-canadian-children-ages-2>**

Cardiac histopathological autopsy - Findings in 2 adolescents after the second dose of the Pfizer COVID-19 mRNA vaccine

“Denmark, Sweden, Norway and Finland stopped COVID-19 mRNA vaccines in children under 18 a long time ago. They clearly know something that Canadian politicians and doctors don't. Dr. William Makis, MD”

"Context.-

Myocarditis in adolescents was diagnosed clinically after administration of the second dose of a Pfizer mRNA vaccine.

Aim.-

To examine microscopic cardiac autopsy findings in adolescent deaths that occurred shortly after administration of the second dose of Pfizer-BioNTech COVID-19 to determine whether the myocarditis described in these cases has the typical histopathology of myocarditis.

Results.-

Microscopic examination revealed features resembling a catecholamine-induced injury, not typical myocarditis pathology.

Conclusions.-

The myocardial injury seen in these cases after vaccination is different from typical myocarditis and has an appearance that closely resembles catecholamine-mediated stress (toxic) cardiomyopathy. Understanding that these cases are different from typical myocarditis and that cytokine storm has a known feedback loop with catecholamines may help guide detection and therapy.

*We report that the microscopic findings are not the alterations seen in typical myocarditis. This suggests a role for cytokine storm, which may occur with an excessive inflammatory response, as there is also a feedback loop between catecholamines and cytokines. **James Gill, MD; Randy Tashjian, MD; “Emily Duncanson, MD.”***
